

Landgraaf: 14 November 2000

Summary of the report; investigation of the effect and findings in natural healing practice with regard to air ion machines made by Geomed Biomedicine based on oxygen and nitrogen.

For this investigation, 100 patients aged between 21 and 74 were tested.

23% aged between 21 and 40 years
62% aged between 41 and 60 years
15% aged between 61 and 74 years

For this investigation the patients were divided into Group A and Group B. Group A inhaled for 6 weeks with a machine of no therapeutic benefit (placebo) whilst Group B inhaled with a machine of therapeutic benefit.

The patients were tested holistically before and after the 6-week treatment period. This included, among other things, the laboratory finding, the condition of the locomotor system (in the case of rheumatic diseases) and questionnaires and interviews regarding their state of health.

The following results were attained in the 3 aged groups in Group B:

Group 1	80% clear improvement 15% some improvement 5% no improvement
Group 2	85% clear improvement 10% some improvement 5% no improvement
Group 3	75% clear improvement 14% some improvement 11% no improvement

Divided into illness groups, this yields the following results:

Patients with cancer diseases:

Group 1	70% clear improvement 10% some improvement 20% no improvement
Group 2	90% clear improvement 5% some improvement 5% no improvement
Group 3	65% clear improvement 25% some improvement 10% no improvement

Patients with allergic/asthmatic diseases:

Group 1		65% clear improvement 25% some improvement 10% no improvement
Group 2		75% clear improvement 10% some improvement 15% no improvement
Group 3	Women	70% clear improvement
	Men	80% clear improvement
	Women	15% some improvement
	Men	15% some improvement
	Women	15% no improvement
	Men	5% no improvement

Patients with autoimmune diseases (arthritis, rheumatism, Bechterew's disease etc.)

Group 1	80% clear improvement 15% some improvement 5% no improvement
Group 2	75% clear improvement 10% some improvement 15% no improvement
Group 3	75% clear improvement 20% some improvement 5% no improvement

The difference between men and women in the case of allergic and asthmatic diseases is probably due to women taking the birth control pill.

During the period of treatment, the subjects dispensed completely with the taking of medicines. Overall, over 88% of all those surveyed stated in addition that they felt better in general, had fewer sleeping problems and headaches as well as feeling they performed better and were fitter.

Finally, I am able to assert that air ion machines have a clear effect on the immune system and the cell metabolism. In the case of rheumatic diseases, it was mostly possible to establish that there was a decrease in the inflammatory process in conjunction with a lack of pain and a clear reduction in feelings of pain.

When tests were done with vitamins and medications, we were able to establish that the patients' prognosis with regard to healing was much more favourable.

In collaboration with Dr. med. Costongs and Dr. med. Funken

**Experience with the use in healing practice of oxygen-nitrogen air ion machines
Made by Geomed Biomedicine**

I operate a large practice in The Netherlands in parapsychology, homoeopathy, neural therapy, chiropractic and natural healing medicine.

Since 1997 I have been using the air ion machines highly successfully for almost all indications, particularly for all forms of chronic inflammations/diseases and for sports injuries and immune diseases. Use of this therapy has proven excellent. I also achieve good success with cancer, stress illnesses and psychosomatic disorders.

It is gratifying that many of my patients react positively to the trouble-free and simple application of air ion therapy. The patients frequently report an improvement in their well-being and performance as well as the disappearance of numerous ailments.

Frequently the patients who come to see me have already been "out-theraped" by conventional medicine and are already suffering in many ways from the considerable side-effects of medicines.

Within ten (10) treatments it is mostly already evident that the treatment has been highly successful.

When combined with other forms of natural healing, only positive effects have been demonstrated to date.
