DV1

DV1 Size - 700mm x 65mm x 50mm

Our product is called DV 1, environmentally friendly, Australian made.

It assists to avoid airborne and surface born infections in room environments, home, office, workplace, hospitals, medical offices, medical clinics, Dental clinics, food displays, restaurants, public counters of government offices, bank offices, schools, libraries, hotels and motels.

Negative ions produced by DV 1 reduce bacteria and virus preventing airborne infections, odours, and surface born infections.

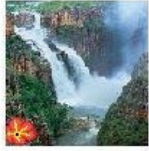

The DV 1 device improves Intelligence, Health and Performance at home, office or workplace. Please visit our website for scientific proof and clinical studies.

DV 1 is available mobile or for ceiling installation.

Kind regards

Mary Ann Meek

Why choose DV1

- Developed from professional medical devices and is safety tested by Australian
- Electrical Society QSS to built into houses offices warehouses production facilities and kitchens

DV1 is developed from medical devices, which guarantees it is safe to use, reliable and provides the highest quality ions. Like its medical counterpart, DV1 charged air destroys 90-95% of bacteria, fungi and virus, protecting your family and colleagues from airborne and surface infection effectively. With air-movement we assure, DV1 to charge the air in the whole room, Up to 100 cbm.

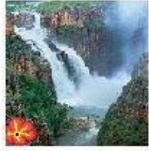

- Quality Assurance!

DV1 is a quality Oxygen ionizer, put through rigorous testing and designed with no compromise. We have passed many of strictest tests in the world, including Australian Tick, GS (Germany) and CCC (China). This means that your Dv1 has outstanding quality and works well with other appliances in your family home or office. You won't have to change the ionizing needles constantly because DV1 uses gold plated needles, rather than the more common alloy ones you see on other ionizers. Moreover, as we are proud of its quality, the price you pay for the device already includes a maintenance fee and any necessary replacement of parts provided you clean the golden needles with care and a small paint brush as used for water colour paintings.

- Environmentally friendly!

DV1 is approved by EcoSpecifier. As a company concerned with protecting the environment, we produce Dv1 with recyclable materials and reduce its power consumption by using low power, efficient elements. Kempe Australia always works with nature and goes green. A warranty of 3 years as well as an expected life time of 50 years plus verify this matter as well as an output

Impedance of 35 million ohms and installation of a fusible link.

- **No Ozone!**

Unlike many other ionizers in the market which produce ozone along with the production of the negative ion, the unique low voltage technology applied in DV1 makes sure it purifies your air without any invisible adverse effects, such as producing ozone. Ozone has proved damaging for our health in a limited indoor space.

* 95 percent of bacteria destroyed within 10 minutes Brisbane study and count July 2008

- Warranty 3 years
- Life Span 50 years
- Low maintenance
- Running costs less than \$ 1 per week
- Weight 400g
- Approved to all possible standards
- Manufactured in Australia Designed in Australia DRG F Kempe Product
- Kempe Preventive Therapies

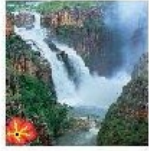

Workplace Advantages of DV1

Improve your social, economic, environmental & social responsibilities

The DV 1 device was developed from medical devices working at a fraction of its capacity and provides a negative ion cloud of oxygen without ozone. The ions live from milliseconds to 5 minutes. The molecules are negative loaded ions of oxygen. Within 5 minutes a room atmosphere of 100cbm is charged provided airflow is present

To a capacity only partly otherwise achieved in medical treatment facilities. Once charged fungi virus and bacteria are destroyed.

www.healthyairtoday.com

The air then becomes high charged and clean.

Advantages

A. Production Flow

The harmonious homogeny charge avoids static clinging of matters during production. (Especially plastic clinging could be avoided)

B. Protect family and colleagues avoid airborne and surface infections

Clinical and Workplace health and safety studies proof that air born infections as well as surface infections are avoided.

Airborne infections

Flu
Chickenpox
Measles
Whooping Cough
Salmonella
Fungi
Hand-foot and mouth disease
disease
Cholera
Pocks
Pestilence

Surface infections

Flu
Chickenpox
Measles
Whooping cough
Salmonella
Fungi
Hand foot and mouth
Cholera
Pocks
Pestilence

C. Negative ions improve body-metabolisms

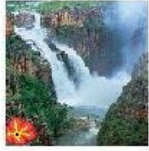

As every medicine book knows all body functions are based on negative ions. They are the cell messenger to transport information within our body.

Nerves Muscles- Tissue Eyes Ears

Active controlled and inactive controlled body functions so called are working only when negative ions are present and there is no harm in case they are in over-supply.

- Brain Matter requires negative ions to function.
- All organs require negative ions to function
- All glands require negative ions to function
- All body control mechanisms require negative ions to function
- Immune system requires negative ions

Data displayed on our web page are clinical studies and work experiences of various entities with high credibility.

They all confirm

- improved health – sickness rate 1:16 (studied on large office facilities with 50 persons per room over a period of six months)
- Improved immune system (even aids infected persons became resistant)
- Better work efficiency (less mistakes - better output - higher quality better trading results)

D. FOOD AND PLANT DISPLAYS last longer

In our tests fresh cut **flowers** lasted more than double time with the DV1 device.
Food displays of fresh produce were able to last in good condition twice as long as without the DV1 device.

E. NO SIDE EFFECTS

As negative ions have a limited life span and they are absorbed through skin and breathing apparatus.

Charged oxygen works without chemicals and negative side effects to liver and kidneys and other parts of our digestive system.

However they activate body metabolisms to improved functions.

Please visit our webpage www.healthyairtoday.com for further information.

READ SUCCESS STORIES OF MEDICAL TREATMENTS ON OUR WEB PAGE

Cost effectiveness of DV 1 with **\$35 rent** per week you will probably save **\$500.00pw** of other costs (rent includes maintenance insurance and replacement if required).

Return on investment

Purchase price \$ 990.00 for 1 DV1 - 100cbm

Or \$ 2,800.00 for three DV1 – 300cbm - plus electric installation recovered due to savings.

On sick staff(experienced ratio 1:16 over 6 months with 50 employees in one room).

The electric device operates on less than 1 KW per hour and is environment friendly.

DV1 High Volume Air Samples & Surface Swabs

The environmental high volume air samples & surface swabs were performed on 22nd July 2008 within the facility of the Cleveland Visitor Villas Motel, 214 Bloomfield Street, Cleveland QLD. Samples were taken before & after treatment of the villas with the DV1 device for 10 minutes.

As you can see from the results there is a remarkable **96.5%** reduction in bacteria & fungi in the room atmosphere after the DV1 device was applied for 10 minutes with a fan circulating the air .

Present for Testing
